***Detailed Office Action***

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claims 1 – 14***

2. **Claims 1–14 are rejected** under 35 U.S.C. 103(a) as being anticipated by van Woesik (5,408,551).

Regarding Claims 1-14, van Woesik teaches an optical fiber comprising a case, an adjustable annular portion in spiral shape [22], a fixing member [35], and an incidence terminal coupled to a bundle of optical fibers [F]. (See van Woesik, figs. 7-8; col. 7, l. 33 – col. 8, l. 7)

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

***Claims 1-13 and 15***

4. **Claims 1-13 and 15 are rejected** under 35 U.S.C. 103(a) as being obvious over van Woesik (5,408,551) in views of van den Bergh et al. (5,068,515)

Regarding Claims 1-13, van Woesik teaches an optical fiber comprising an adjustable annular portion in spiral shape [22], a fixing member [35], and an incidence terminal coupled to a bundle of optical fibers [F]. (See van Woesik, figs. 7-8; col. 7, l. 33 – col. 8, l. 7)

Regarding Claim 15, van Woesik does not teach an optical fiber configuration without a case. However, van den Bergh teaches an optical fiber configuration without a case. (See van den Bergh, fig. 1) Since van Woesik and van den Bergh both teach optical fiber configurations, it would have been obvious to one of ordinary skill in the art to modify van Woesik to have the caseless configuration taught by van den Bergh because the resultant configuration would facilitate coupling to a microscope. (See van den Bergh, col. 1, l. 67 - col. 2, l. 17) One would

Art Unit: 2883

have been motivated to make this modification because microscopes would benefit from tunable (adjustable) light sources.
